**JAS. F. MORGAN,**  
AUCTIONEER.

## MOLOKAI BEEF.

## Cattle Are Said To Be Lost at Sea.

**WILDER'S STEAMSHIP COMPANY** and the Board of Health are again at loggerheads. Letters were read during yesterday's session of the Board of Health by Executive Officer Pratt which revived the old controversy as to freight charges, and the landing of cattle and food products. One of the letters from the steamship company raised the point that all consignments of paa should be paid for by the Board above the regular weekly freightage charges now in the contract, as it was being shipped by contractors for the Board.

A second letter was in answer to charges made by Superintendent Reynolds that, on a recent trip, the Wilder company lost five head of cattle out of total of forty-nine in landing them, together with sundry parcels of food-freight. Executive Officer Pratt had instructed the secretary of the Board to make a claim against the steamship company for the five head of cattle. The company replied that five bags of rice and one of flour had been delivered on a subsequent trip. Mr. Reynolds stated to the Board yesterday that he had no knowledge of their being delivered, as he had just left the Settlement. In regard to the claim for the five head of cattle, the company stated the cattle were taken on at the risk of the shipper. Executive Officer Pratt said that the contract read that the company is to take all reasonable care of the cattle in landing them. The contention, as made by Superintendent Reynolds, is that the company did not exercise reasonable care in the instance discussed. Superintendent Reynolds said:

"The landing of the forty-nine head was made in a perfect calm. I don't see any reason why the cattle should have been lost. One of the ship's officers told me this. They took a boat with a number tied on either side, and when near the shore they let them go, and if one or two got out to sea they don't look after them at all, but go back for another load, and after they are through they pick up the stragglers, which are possibly exhausted and worn out and drowned before they can get them to shore. The mate of the steamer said it was due to carelessness. Another steamer which came recently, landed its entire cargo in an angry sea without losing one."

Mr. Winston thought the matter was a very important one and should be referred to a committee for a thorough investigation. President Raymond said the Board had had a great deal of correspondence with the company on these matters, and while the Board did not desire to engage in a controversy, yet he was desirous of seeing the service carried on as it should be. He wanted the freight carried properly and delivered according to agreement, and he wanted to find out to just what extent the company had been negligent. He was of the opinion that there must be some way of reconciling the differences between the company and the Board and a remedy proposed or the service improved by the company. Upon motion the matter was referred to a committee consisting of Messrs. Winston, Lowrey and Pratt.

## PAIAI WAS BAD.

## Reasons For Food Scarcity Among Lepers.

**THE** House Committee on Public Health will make a thorough investigation of the lack of taro and poi for the lepers at the settlement at Kalaupapa. During the session of the Board of Health yesterday the matter was brought up by Executive Officer Pratt, who explained to the House Committee, which was present, the difficulties lately encountered by the Board of Health agents in procuring healthy taro. Dr. Pratt said he had made an arrangement in Honolulu for taro to be shipped to the leper settlement, but it had turned out badly, and did not agree with the samples first submitted to him. The first lot shipped from Honolulu in January, was 166 bags, and Superintendent Reynolds had at once requested him not to make any further shipments of the same kind of taro, as it was mostly diseased, and unfit to be made into poi.

A second shipment had been forwarded, consisting of 200 bags, and upon investigation of these at their destination, 114 bags were found in a condition which made it impossible for the contents to be eaten. A committee of three persons chosen from among the lepers, who were supposed to be the ones to partake of the taro, had inspected it and pronounced it bad. The executive officer had thereupon instructed Mr. Reynolds to condemn the stuff and destroy it.

Dr. Cooper then moved that the matter be referred to the Attorney General for an opinion as to the board's liability in the matter of the payment for the taro. Mr. Lowrey moved that the board decline to pay for what was condemned. President Raymond said the contractors had put up a bond of \$1,000, and the question arose as to whether the board should compel the bondsmen to make good the loss in freights and general expenses connected with the shipments. Mr. Dole gave it as his opinion that the board had the right to refuse payment. Only actual damages could be recovered by suit. Upon motion of Mr. Lowrey the board took the stand that it would not pay for the condemned taro.

For the information of the visiting legislators, Dr. Pratt then went into the history of the former contracts, and the failure of the contractors to supply the settlement, so that complaints began to come in from a few "sore-heads" among the lepers. At present, however, taro was being pulled in the Molokai valleys, and the threatened poi famine had been tied over.

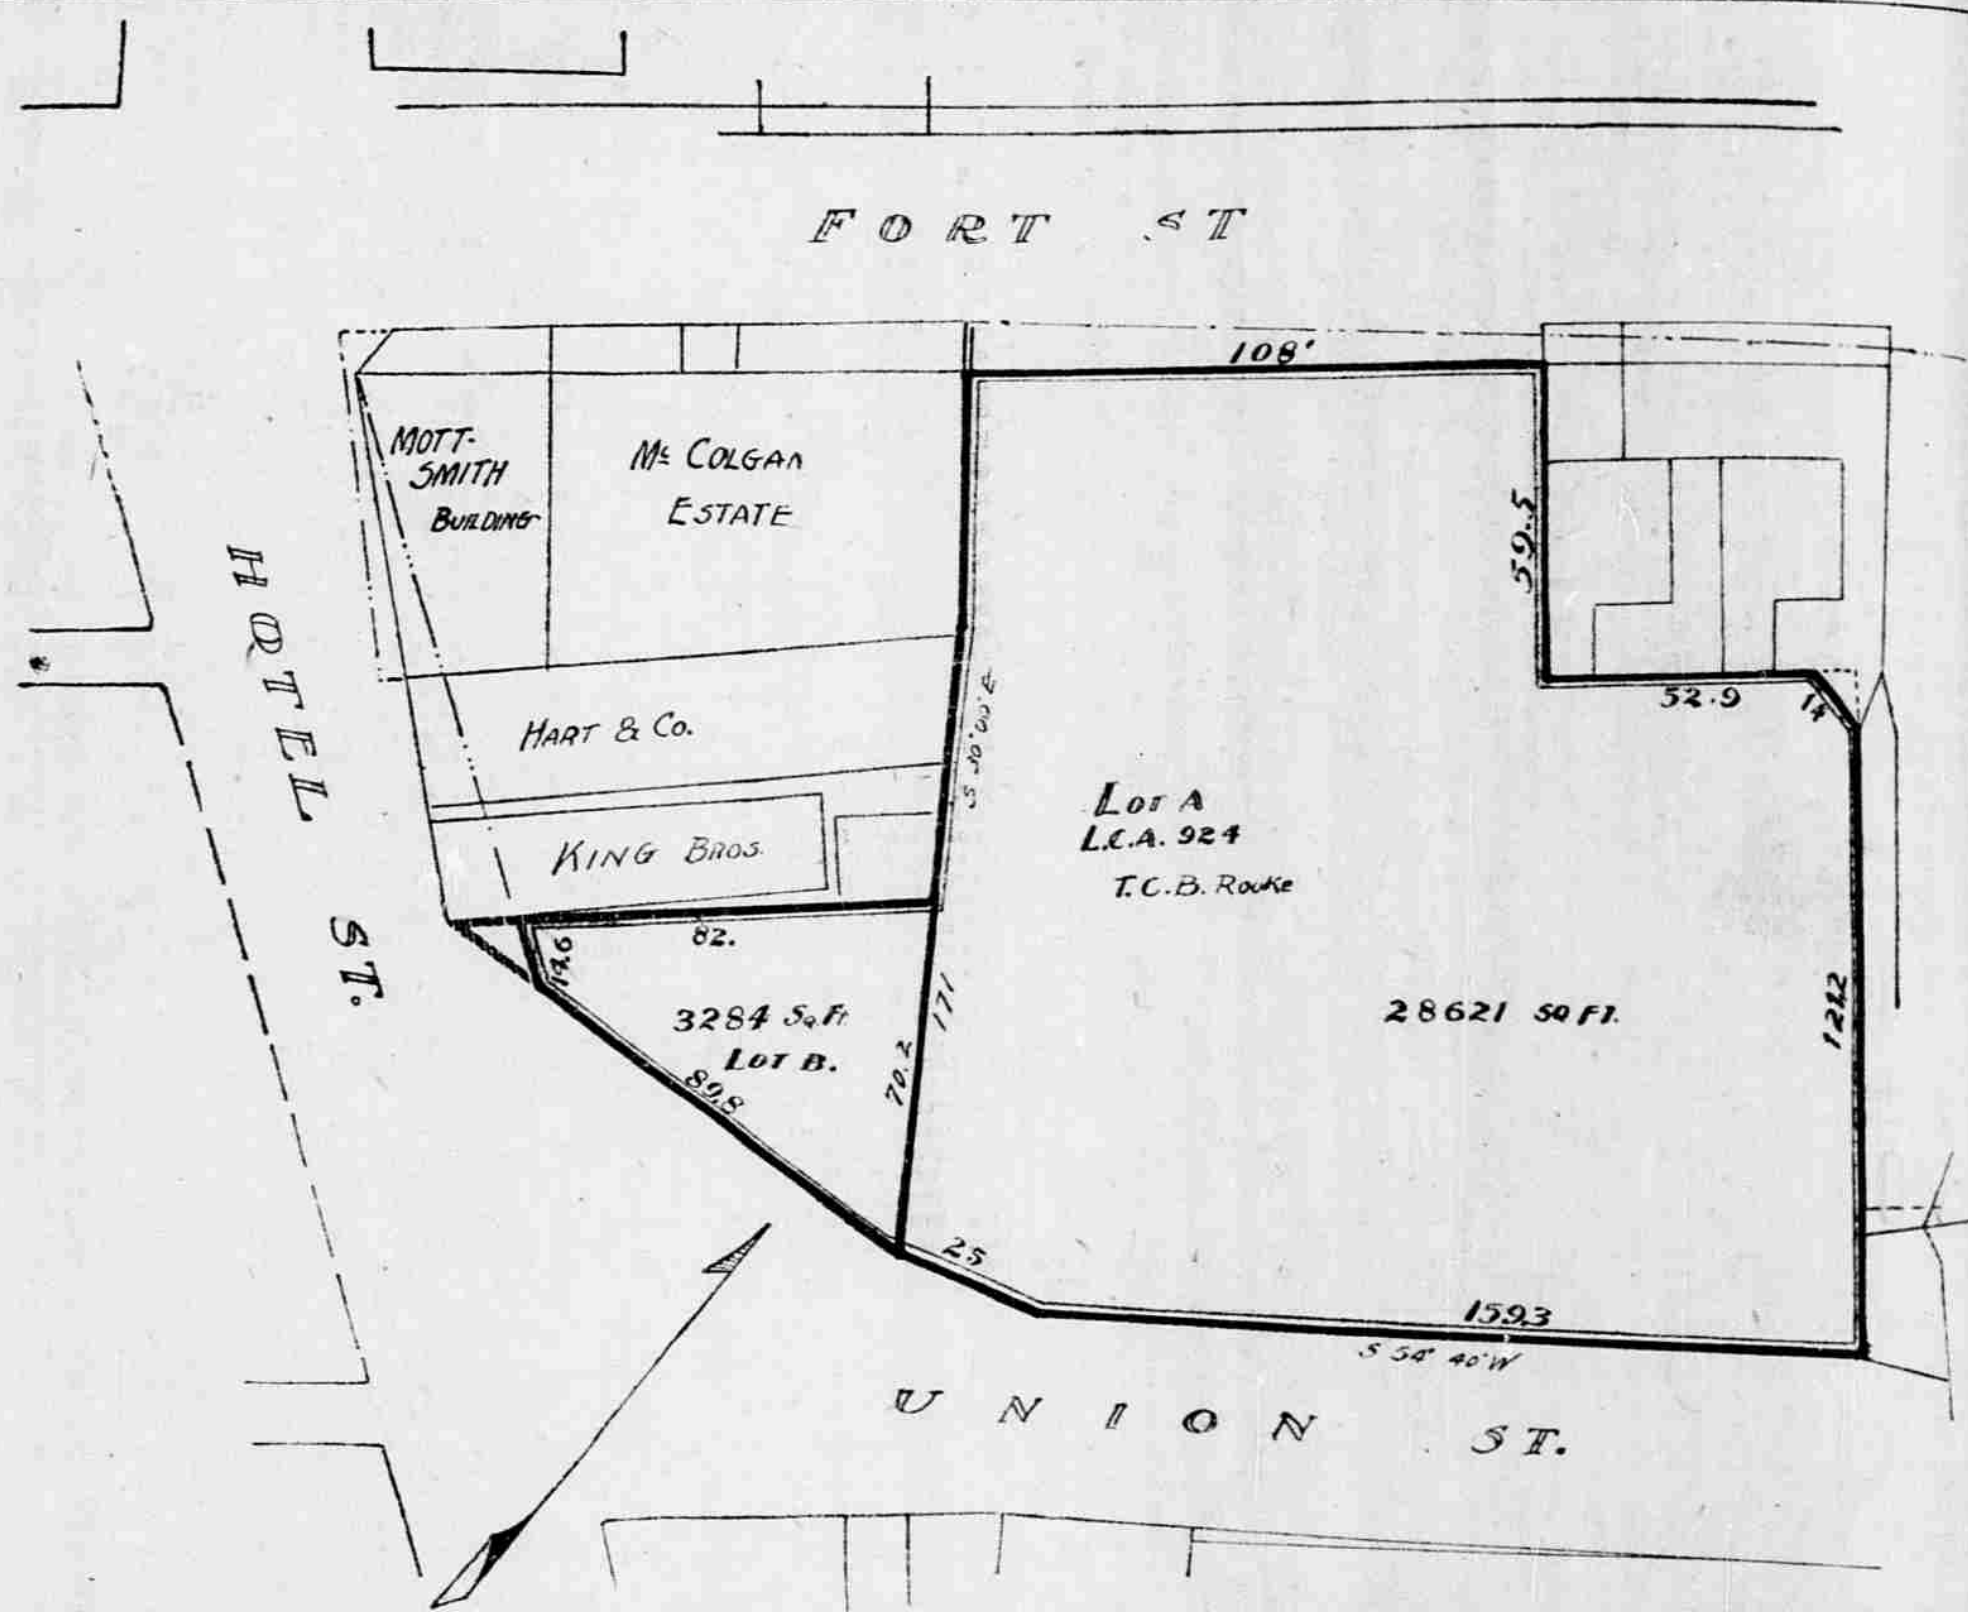

Dr. E. C. Chapman will lecture on "The Stones Crying Out; or the Testimony of Modern Discovery in Bible Lands to the Truth of the Scriptures," at the Young Men's Christian Association tomorrow night at 8 o'clock.
